This Adjustable Base can be operated from your personal iOS or Android device through the Leggett & Platt Prodigy™ 2 app. For Android devices, go to page 9.

To pair with your bluetooth enabled iOS device:

1. Go to the App Store.
2. Search for the Leggett & Platt Prodigy™ 2 app.
3. Download the app to your personal device.
4. Tap the app and enter the Childlock passcode 4321, if prompted. If not prompted to enter a passcode, proceed to Step 5. Note: To turn off Childlock, go to Settings screen and slide button selector over.
5. Ensure that there are no batteries in the power supply and unplug the base from the wall. The control box has to be completely off in order to boot back into pairing mode. Wait at least 1 minute to ensure that the control box completely powers down.
6. Plug the base back into the wall. Once plugged in, the control box will be in Bluetooth pairing mode for 2 minutes. If you can see the control box attached to the deck board, there will be a flashing blue LED.
7. Go to the Bluetooth setting on your device and pair with the device that has “Okin” at the beginning of the name. It will look like Okin-############ (a number after Okin). Once the devices are paired in the settings, you can launch the app and it will be connected.
POSITION SCREEN

1. **Head** – Slide the ‘HEAD’ button up to raise the head of the adjustable bed. Slide the ‘HEAD’ button down to lower the head of the adjustable bed.

2. **Pillow** – Slide the ‘PILLOW’ button up to tilt the pillow area of the adjustable bed forward. Slide the ‘PILLOW’ button down to tilt the pillow area of the adjustable bed backward.

3. **Foot** – Slide the ‘FOOT’ button up to raise the foot of the adjustable bed. Slide the ‘FOOT’ button down to lower the foot of the adjustable bed.

4. **Flat** – With the head, pillow, or foot raised, pressing the ‘FLAT’ button will lower head, pillow, and foot to the flat position.

5. **Light** – Pressing the ‘LIGHT’ button will turn the under bed light on/off.

6. **Snore** – The ‘SNORE’ button raises the head of the bed 7 degrees for 15 minutes. After 15 minutes the head of the bed will automatically lower to a flat position.
MASSAGE SCREEN

1. **Head Intensity (massage)** – Press the up arrow to turn on the massage and increase massage intensity. Press the down arrow to decrease massage intensity and turn off the massage. There are 3 levels of massage intensity.
2. **Foot Intensity (massage)** – Press the up arrow to turn on the massage and increase massage intensity. Press the down arrow to decrease massage intensity and turn off the massage. There are 3 levels of massage intensity.
3. **On / Off button** – Turns on or off all massage motors.
4. **Wave** – The wave function increases and decreases the intensity between the head and foot massage motors with 3 levels of wave speed.
**SETTINGS SCREEN**

1. **Child Lock** – Slide to turn on/off the passcode for the app.
2. **Change PIN** – Change the default passcode of “4321” to one of your choosing.
3. **“Press and hold”** – In “press and hold” mode, press and hold the button (flat or saved favorites) to move bed to desired position.
4. **"Press and release"** – In “press and release” mode, press and release the button (flat or saved favorites) to move bed to desired position.
5. **Bed Selector** – Connect to desired base in a King / Split Cal King setup.
**PRODUCT SCREEN**

1. **Timer** – Sets a countdown timer to automatically adjust base to one of the 4 saved favorite positions.
   a. Open the Timer Settings box by touching the Timer icon ⌁.
   b. Enter the desired countdown time (time until base adjusts to position).
   c. Select position from dropdown menu.
   d. Touch **Start Timer**.
   Touch **Stop Timer** to turn timer off.

ALARM SCREEN

1. **Alarm** – Provides a “gentle wake up” - set a desired time and the massage motors will turn on and gently wake you up.
   a. Open the Alarm Settings box by touching the Alarm icon.
   b. Enter the desired time to be gently woken up.
   c. Touch **Start Alarm**.
   Touch **Stop Alarm** to turn alarm off.
FAVORITE POSITIONS SCREEN

1. **Favorite Positions** – Base will automatically adjust to this position by touching the Favorite Position name.
   a. Open the **Favorite Positions** box by touching the **Favorites** icon.
   b. Touch **Fave 1**, **Fave 2**, **Fave 3**, or **Fave 4** to adjust base to that saved position.

2. You can also reprogram and rename these 4 Favorite Positions.
   a. Adjust the base to the desired position.
   b. Open the **Favorite Positions** box by touching the **Favorites** icon.
   c. Touch **Edit**.
   e. To rename position, click inside **Enter New Name** field. The keypad will open.
   f. Type the new name.
   g. Touch **Save**.
      The massage motors will buzz once, and then buzz three more times to indicate position is saved.
   h. Repeat procedure for remaining favorites.
   i. To cancel position override, touch **Cancel**.
